UPLOADING CONTENT IN BULK FOR

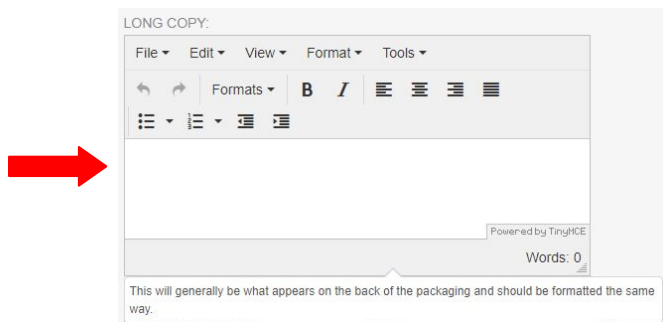

1) Log into SKUlibrary using the details sent to you in the content request email. Click on the **Download List of Products** button on the left hand side to download the list of products which Kmart are requesting content for.

2) Populate the spreadsheet with the relevant data for your products. Please note that fields differ between categories and not all fields will be relevant to your products.
    To view more information on what each field requires, you can hover over the specific fields in SKUlibrary to see an explanation.

3) You can also provide a download link for your product images if you would like to us to upload your images in bulk too. Please ensure images are named to the product's product code e.g. **KMART_123456.jpg**. Images must meet the following specifications:

    - JPG format
    - 1000 pixels minimum

4) Once you have completed the spreadsheet, attach it to the form on the Kmart Bulk Upload page along with a download link to the images for your products if required. You will be notified via email once your bulk upload has been completed.

FAQ's
? How do I add products?
? How do I add or remove users?
✔ Please fill out this form (https://www.skulibrary.com/skucapture-ticket/) with the details of the product or user that you would like to add or remove.
